APPLICANT : SONY CORP;

INVENTOR : UMEMURA JUNJI;

INT.CL. : H04N 5/58

TITLE : TELEVISION RECEIVER

ABSTRACT : PURPOSE: To obtain a suitable contrast at all times by decreasing the correction for a brighter scene by means of an APL detecting signal of a luminance signal.

CONSTITUTION: A detecting signal S_{17} is extracted from a detecting element cds16 of an external luminous amount L to correct the contrast and the APL of the luminance signal S_y is detected, and this detecting signal S_{19} decrease the correcting amount, as the APL is increased in the correcting circuit. Thus, it is avoided to obtain a too white screen when the screen is subject to a bright scene.
